DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-13 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claim 1 and dependent claims thereof are allowable for the inclusion of the limitation "control means for controlling a series of correcting operations for correcting a positional offset between the images of the respective colors, wherein said control means executes the correcting operation in a first stage and second stage, corrects a positional offset on a pixel basis in the first state until the positional offset correction amount reaches a predetermined target range, and corrects a positional offset including a correction amount less than a pixel unit in the second stage".

Claim 5 and dependent claims thereof are allowable at least for the inclusion of the limitation "control means for controlling a series of correcting operations for correcting a positional offset between the images of the respective colors, wherein after deriving a positional offset correction amount by printing and measuring test images, said control means repeatedly executes correction of a printing position of an image on the basis of the positional offset correction amount, corrects a positional offset of an image on a pixel basis while the derived positional offset correction amount has not reached predetermined target range, and corrects a printing position of an image including a correction amount less than a pixel unit when the positional offset correction amount has reached the target range".

Art Unit: 2861

Claim 10 is allowable for the inclusion of the limitation "executing color misregistration correction in a first stage and a second stage after the first stage; correcting a positional offset on a pixel basis in the first stage until a positional offset correction amount for images of the respective colors reaches a predetermined target range; and correcting a positional offset including a positional offset correction amount less than a pixel unit in the second stage."

Claim 11 and dependent claims thereof are allowable for the inclusion of the limitation "repeating the steps (a) (c) until the positional offset correction amount reaches a predetermined target range; and correcting the positional offset between the images of the respective colors including a positional offset with an amount less than a pixel unit when the positional offset correction amount reaches the target range."

By performing correction in two stages, the positional offset of an image of each color can be efficiently performed in a short period of time.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claim 1, line 22 of page 32, change "state" to --stage--.

Art Unit: 2861

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huan H. Tran whose telephone number is (571) 272-2261. The examiner can normally be reached on at work on W-F from 6:30 to 5; T are telework days.
